Another secret is how difficult it is to make a wooden house. It will take some time to collect all the wood. to create it. However, you can hit the side of the hill to make a cave. It will serve as your home, while wood will be used as a bed and fireplace. Minecraft doesn't offer soft gameplay when you're in survival mode. In addition to the challenges that come with completing your inventory, you will need to protect yourself from monsters that come out at night. If they kill you, your inventory will return to zero. Don't worry, you can still get them back. You will only have to go back to where you died. This set of tasks will be overwhelming for the first clocks. What you can do is change the difficulty mode to Calm. In this way, all monsters will be wiped out of the world until you are confident enough to fight them off. Where can I run this program?
